Spring Garden Book 1922

MAR 9 1923

With shelter for the spotted toad,
And welcome and good fare
For any little singing bird
That cares to linger there.

LAWNS

The paramount question asked every spring by owner of bungalow or country estate alike is:

How can I establish a beautiful permanent lawn?

How can I restore a poor lawn?

How can I keep a well established lawn in good condition?

We say: First of all, **buy only the very best seeds obtainable, even if it costs a little more.** You wish to raise **Grass** not **weeds**. Be sure that the soil for your lawn is rich, so as to furnish the grass roots an abundance of food. Sow the seed as early in the spring as possible to get the grass well started before the very hot weather arrives.

If your **established lawn** has been fertilized in fall it will not need it in spring. If not, the best dressing for a lawn in spring is one of **Bonemeal**.
